

CONSTRUCTION NOTICE

CAMPUS INFRASTRUCTURE PROJECT– EAST MALL LAWN

March 28th – September, 2022

Later this month, we will be starting a project to mitigate stormwater flooding in university buildings south of the Mall. Numerous holding tanks will be buried beneath the lawn on the east side of the Mall to retain and reduce the amount of water in Cherry Avenue during rainstorms.

Sundt Construction will begin mobilizing on March 28th; followed soon by the excavation of the Mall lawn; then the installation of tanks over the summer; and finally the replacement of the turf by early fall.

Campus Infrastructure Project - East Mall

March 28th - September, 2022

Pedestrians, Vehicles & Bicycles

The East Mall lawn will be fenced and closed to pedestrians. Cherry Ave. will remain open. University Blvd. will remain open with narrower lanes for vehicles, please share the roadway with bicycles. Temporary overnight lane restrictions on Cherry and University will be required occasionally - separate construction notices will be provided when dates are determined.

Sun Tran Bus Stop

The transit hub (bus stop) near Meinel Optical Sciences will be closed to avoid congestion with parked buses. The bus Route 15 bus stop will be temporarily relocated to the corner of Campbell Avenue and Third Street. Express routes 102 and 103 campus stops will be relocated to the North curb on Second Street at Cherry Avenue.

Cat Tran

The Cat Tran Red route stop at the Optical Science building will be temporarily moved to the 4th and Cherry stop. The Red route will be redirected to travel north on Cherry to 2nd Street, east on 2nd Street to Campbell to resume route back to 9008 Lot. All other stops for this route will not be affected. Red route spring services end May 13 and will resume August 15.
