OVERVIEW

A space analysis was prepared for the College of Science to provide insight into the current utilization of space. The data used in compiling this report was derived from two main sources: the current Physical Space Inventory and UAaccess Analytics. This analysis documents the amount of space under the control of the College and compares the data to national space standards adopted by the Arizona Board of Regents¹. The College of Science currently occupies a total of 1,336,991 net assignable square feet (NASF) in several buildings on and off campus. Research/Nonclass Laboratory space makes up most of the College's total space at 763,881 NASF (57%) followed by Office space at 375,362 NASF (28%).

The College utilizes 440,449 NASF of off campus space that encompasses various special use facilities such as Biosphere 2 and Steward Observatory telescopes. Due to the uniqueness and specific nature of the College’s off campus space, it was excluded from the space standard calculations. Office space needs are met with a 29,028 NASF surplus of On Campus Office space. However, the College is experiencing a deficit of both Class Laboratory and Research/Nonclass Laboratory space of 41,460 and 45,068 NASF respectively. It is notable that 6,563 NASF was removed from the department of Chemistry & Biochemistry’s total research lab space in the Old Chemistry Building as it is unusable at its current state.

A breakdown of the College of Sciences space by programmatic function within on and off campus space shows that Sponsored/Organized Research makes up the largest activity taking place in the College's space at 48.67%. Instructional activities occurred in 25.42% of the space followed by Academic Support activities at 13.09%. This breakdown of space is reflective of the research-intense nature of the College while demonstrating a significant instructional component.

The College of Science is transitioning into a new “business service model” that combines the administrative resources of similar units to oversee such items, such as space, while still maintaining a clear separation/identification of departments and assigned space. Due to the new “business service model” it is anticipated that similar units will likely share physical space resources in the future in order to further develop research based activities to combat the College’s shortage in Class Laboratory and Research/Nonclass Laboratory space. It is recommended that the College identifies the space allocations between the Computer Science department and School of Information: Science Technology & Arts (SISTA) to improve the University’s ability to capture space utilization/need information at a departmental level in the future.

A trend seen throughout the College is the utilization of vacant space for research based activities; as well, for the recruitment of new faculty and staff. Various departments are leveraging identified vacant space as a recruitment tool for new faculty and staff in hopes to better utilize their allocated space in the near future. In addition, the College is minimizing space used by visitors and outside agencies to house various programmatic functions/activities.

We would like to acknowledge the cooperation and assistance of all departments involved in this analysis.

<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Instruction</td>
<td>The teaching and training activities of an institution. Except for research training as provided in subsection (1) of Sponsored/Organized Research, this term includes all teaching and training activities, whether they are offered for credits toward a degree or certificate or on a non-credit basis, and whether they are offered through regular academic departments or separate divisions, such as a summer school division or an extension division.</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Department Administration</td>
<td>Activities that include administrative and supporting services benefiting common or joint departmental activities or objectives in academic deans’ offices, academic departments and divisions, and organized research units. Organized research units include such units as institutes, study centers, and research centers.</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Department Research</td>
<td>Research, development and scholarly activities that are not organized research, such as start up funds, and consequently are not separately budgeted and accounted for at a project level.</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>General and Administrative</td>
<td>This space classification supports the general executive and administrative offices of educational institutions. Examples of general administration areas include: the President’s or Chancellor’s office, the offices for institution-wide financial management, business services, budget and planning, personnel management, and safety and risk management, the office of the General Counsel, and the operations of the central administrative management information systems.</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Libraries</td>
<td>This category includes library space that is centrally-managed and separately budgeted and accounted for by the University official library system including: University Library, Health Sciences Library, and Law Library.</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Operations and Maintenance</td>
<td>This space classification supports the campus physical operations including: central heating/refrigeration plants, custodial rooms, security, and environmental safety and hazardous waste disposal.</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Other Institutional Activities</td>
<td>Means all University activities not defined elsewhere within this document. Examples include traditional auxiliary enterprises such as: operation of residence halls, dining halls, hospitals and clinics, student unions, intercollegiate athletics, bookstores, faculty housing, student apartments, guest houses, chapels, theaters, public museums, and other similar auxiliary enterprises. Also included in this program would be faculty, professor emeritus and staff who do not receive compensation from the institution.</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Other Sponsored Activities</td>
<td>Programs and projects (including Public Service) financed by Federal and non-Federal agencies and organizations which involve the performance of mission-oriented activities, other than Instruction and Sponsored/Organized research. Examples include exhibits/galleries, planetariums, community/health service programs/projects, and community/economic development activities/programs.</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Outside Agencies</td>
<td>Those activities that are controlled or operated by outside agencies, but that are housed or otherwise supported in some way by the institution. University affiliates do not receive any salary from the University for the duties and services they perform, but do occupy University space. Examples of this would be University Medical Center, National Weather Service, or the U.S. Geological Survey.</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Service/Recharge Center</td>
<td>Includes space of University departments or sections that provide goods/services on a continuing basis primarily to other University entities on a charge basis. Interdepartmental Billings (i.e., IDBs) constitute the primary funding/revenue source for recharge centers, service centers and specialized service facilities. These billings are directly related to (although not necessarily equal to) the cost of the goods/services.</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
### Program Classification

<table>
<thead>
<tr>
<th>Program Classification</th>
<th>Definition</th>
</tr>
</thead>
</table>
| Sponsored/Organized Research  | All research and development activities of an institution that are separately budgeted and accounted for. It includes:  
1) Sponsored/Organized research means all research and development activities that are sponsored by Federal and non-Federal agencies and organizations, as well as cost-shared by the University. This term includes activities involving the training of individuals in research techniques (commonly called research training) where such activities utilize the same facilities as other research and development activities and where such activities are not included in the instruction function.  
2) University research means all research and development activities that are separately budgeted and accounted for by the institution under an internal application of institutional funds, such as faculty small grant projects funded by the Vice President for Research. University research, for purposes of this document, shall be combined with sponsored research under the function of organized research. |
| Student Administrative Services| This heading supports student affairs administration including such activities as deans of students, admissions, registrar, counseling and placement services, student advisers and student health and infirmary services. |
